Probability Assignment 1

EE22BTECH11209 - GUMMAPU SATHWIK PREETHAM*

Question: Events A and B are such that

$$Pr(A) = \frac{1}{2}, Pr(B) = \frac{7}{12} \text{ and } Pr(A' + B') = \frac{1}{4}.$$
 (1)

1) State whether A and B are independent?

Solution:

$$Pr(AB) = 1 - Pr(A\prime + B\prime)$$

$$=1-\frac{1}{4}$$
 (3)

$$=\frac{3}{4}\tag{4}$$

$$= \frac{3}{4}$$
 (4)

$$Pr(A) \times Pr(B) = \frac{1}{2} \times \frac{7}{12}$$
 (5)

$$=\frac{7}{24}\tag{6}$$

$$Pr(AB) \neq Pr(A) Pr(B)$$

(7) (8)

: A and B are not independent.
